

This is the first update for the 2013-2014 influenza season. Influenza is currently being detected at low levels in King County. No influenza-related deaths or facility-based outbreaks have been reported to date. The University of Washington Virology laboratory has shown an increase in rhinovirus activity over the past three weeks.

		Data for this wee	Cumulative data this season since October 1, 2012
Laboratory-Confirmed Influenza Deaths		0	0
